

TeamManager

The Team Management & HR System That Replaces Multiple Tools, Cuts Admin Work in Half, and Keeps Every Hire and Task on Track In One Dashboard

Finally: one platform where your HR team recruits, onboards, manages, and tracks performance. No more switching tabs, chasing updates, or losing candidates in a spreadsheet.

It's high time you ended this time-consuming cycle...

1

 **You post a job. Applications land everywhere.**

Applications land in your inbox, your WhatsApp, maybe even a DM.

 **You compile, schedule, and manage manually.**

2

You compile a spreadsheet. Schedule interviews manually. Send reminders. Miss one. Lose a great candidate. And start all over again. That can be tiring!

3

Team sync becomes a nightmare.

You finally hired more people because of extra roles, yet keeping everyone in sync still takes more effort than it should. Tasks get assigned in meetings and forgotten by Wednesday. You're not sure who's working on what. Accountability becomes a conversation, instead of a system.

4

You try to fix it with more tools.

The worst part? You've tried fixing it. You've tested tools. Added a spreadsheet here. A project management app there. A calendar. An email thread.

5

Now you have more tools to manage than actual work.

And now you have more tools to manage, which is now competing with your actual work time.

The Reality: According to Deloitte, HR teams spend up to **73% of their time on administrative tasks**, time that should be spent on people, not paperwork.

TeamManager was built to end this

Not just another tool. A single command centre where every hire, task, and team member is accounted for, without the back-and-forth.

Everything your HR team needs. Built into one clean, intuitive platform.

HR & Talent Suite: Hire Faster. Hire Smarter.

 Centralized Application Management

Every applicant is captured and organized automatically; no more digging through emails to find who applied and when. Every submission lands in your dashboard, structured and ready for review.

 One-Click Decision Making

Accept or reject candidates in a single click; your team reviews documents, flags qualified applicants, and moves them through the pipeline without a single email thread.

 Automated Interview Scheduling

Schedule interviews without the back-and-forth; choose the date, pick the panel, decide physical or virtual, and the system handles confirmations and reminders. Automatically.

 Structured Interview Feedback

Interview feedback, stored and searchable; no more relying on memory or scribbled notes. Every evaluation lives in the system, so your panel makes consistent, fair decisions.

 Seamless Onboarding Workflow

From hired to fully onboarded in one workflow: contracts, documentation, IT setup, department assignment. The moment a candidate accepts, onboarding begins; Zero manual handoffs.

 Auto-Created Employee Profiles

Employee profiles, auto-created at onboarding: name, role, department, manager, performance tracking. Everything your HR records need, in one place, from Day 1.

 Task Management: Know Who's Doing What. Always. **Quick Task Assignment**

Assign tasks in seconds, track progress without asking; create a task, assign it, and watch it move. No check-in meetings just to find out if something is done.

 Sub-Task Breakdown

Break big projects into sub-tasks so nothing falls through the cracks. Every piece of a project is tracked, from the first step to the final submission.

 Work Approval System

Accept or reject completed work from your dashboard. When a team member marks a task done, you review and approve or send it back with comments. Accountability is built in.

 Activity Visibility

See every team member's activity at a glance; who's overloaded, who has capacity, who's working on what. No duplication of effort. No guessing.

 Smart Calendar: Scheduling That Runs Itself. **Candidate Self-Booking**

Let candidates pick their own interview time; share your booking link. They see your available slots (not your private calendar), choose a time, and the meeting is confirmed. No emails.

✓ **Team Check-in Scheduling**

Team check-ins, booked without the group chat, share your availability with your team, and let them pick. Reminders go out automatically. Cancellations follow your policy.

✓ **Privacy-First Calendar Control**

Your personal events stay private. Clients and candidates only see what you choose to show. Full control over your calendar, zero exposure to anything else.

Flow Monitor: Know Exactly Who's In. In Real Time.

✓ **Automatic Attendance Tracking**

No more guessing who resumed, who's late, or who called in absent; the system tracks exact clock-in and clock-out times automatically, so your attendance records are precise, not approximate.

✓ **Verified Check-In Methods**

Clock in and out using fingerprint, Face ID, or a unique QR code; no proxy attendance, no buddy punching, no disputes. Every record is tied to the individual, verified automatically.

✓ **Actionable Attendance Insights**

Turn attendance data into a management tool; see who's consistently late, who's present, and who needs a conversation, all without chasing anyone or cross-referencing a register.

Mail & Memo: Communication That Stays Where Work Happens.

✓ **Structured Internal Communication**

Replace the WhatsApp threads and email chains with a structured internal communication system; send messages, share files, and keep every conversation in one central location, built into the same platform where work gets done.

✓ **Tracked & Searchable Records**

Every message is tracked, every directive is on record; no more 'I didn't see the message' or 'it got lost in the chat.' When communication is structured and searchable, accountability follows naturally.

Payroll: Run Payroll in Minutes, Not Hours.

✓ **Automated Salary Calculations**

Calculate salaries, deductions, and loan repayments without touching a spreadsheet; the system handles the numbers, so your team gets paid accurately and on time, every time.

✓ **Full Review & Approval Control**

Review and approve payroll before a single payment goes out; full visibility, full control, and zero last-minute errors that damage trust with your team.

✓ Seamless Backend Reconciliation

Everything runs in the background; what used to take hours of reconciliation now takes minutes. So your finance and HR teams spend less time on salary administration and more time on decisions that actually grow the business.

You might be thinking...

? We already use different tools for this...

Most teams use 3-6 different platforms for what TeamManager does in one. That's 3-6 logins, 3-6 subscriptions, and 3-6 chances for things to fall out of sync. **With TeamManager, your recruitment, task management, and scheduling live together, so your data does too. One platform means nothing gets lost between tools.**

🕒 How long does it take to set up?

You can start using TeamManager within minutes. No IT department required. No lengthy onboarding. Create your account, invite your team, and you're live. The intuitive interface makes it easy for your entire team to adopt immediately.

📏 Is this right for a team our size?

TeamManager scales with you, whether you're managing a team of 5 or 500. Start with what you need today. Add more as your team grows. You're not locked into a rigid structure. Features and capabilities grow with your organization.

Your team deserves a smarter system. Here it is.

Every day your team operates without a properly aligned structure, you're losing time, missing candidates, and leaving productivity on the table. TeamManager closes that gap.

No more Disorder. No more scattered tools. No more wondering who's working on what.
